Subject: Just a couple updates needed for DeAndre's Biweekly Meeting

Hi Jamie,

Just a couple of updates that I need:

- A call was facilitated between NDA, OPP, TTPB, ORC and ECAD to review the history of an ethanol plant in NE. UNL has indicated they have been experiencing bee losses from their bee yard at the Ft. Mead Research Facility located 1.5 miles from the plant. UNL has expressed some questions about whether the losses could be the result of neonic exposure from the wet cake being stored on the site. A call is scheduled with UNL and OPP on 6/8/20.
 - Do you have any updates from this call?

UNL, R7 LCRD and ECAD, and OPP participated in a call where UNL researchers shared information that they believe may indicate that their managed bees may be being impacted by either foraging on wet cake or by taking up contaminated discharge from the facility. The data presented was limited and they are hoping to do additional research. OPP asked numerous questions regarding the data and in follow-up discussions indicated that there wasn't sufficient information available to support a nexus between the impacts to the managed hives and the facility. UNL has indicated they intend

to continue to do research in the issue. They had requested forming some type of work group that appeared to be aimed at further evaluating these issues more broadly and perhaps formulate policy recommendations. We did indicate we would be interested in continuing hear updates on the progress of their research.

• **Ex. 5 Deliberative Process (DP)**

Ex. 5 Deliberative Process (DP)

If possible, by COB or first thing in the morning so I can get this off to Julia and Tracey would be appreciated. DeAndre's biweekly meeting is scheduled for tomorrow at 11am.

Thanks,
Nicole
